

Research group investigating gene regulatory networks in the human commensal and pathogenic yeast *Candida albicans* is looking for highly motivated **PhD candidates and postdoctoral researchers.**

The successful applicants will become part of Dr. J. C. Pérez's group in the Institute for Molecular Infection Biology at Universität Würzburg starting in Summer/Fall 2016.

Our group uses a combination of genomics, genetics, molecular biology and bioinformatics approaches to study the traits that allow *C. albicans* to inhabit the human body. The successful applicants must have a Master's and/or a PhD degree and a strong foundation in at least one of our described areas of interest. Demonstrated experience with mouse models of infection and analyzing RNA-seq and ChIP-seq data sets is highly desirable. Daily communication in the Institute is in English.

Applications from suitably qualified people from all sections of the community regardless of race, gender or disability are welcome. Preference will be given to severely handicapped persons in case of otherwise equal aptitude. Part time employment is also possible. Please send your application including a letter describing research accomplishments and research interests, CV, and contact information of 2-3 academic references.

Send your applications **written in English as a single PDF file** to Dr. Pérez ([christian.perez@uni-wuerzburg.de](mailto:christian.perez@uni-wuerzburg.de)) by July 1st, 2016.
